# NATURAL PLAYSPACES FOR CHILDREN

## Playful Plantation at Sesc Interlagos

### Theme/Place:

Outdoor play - São Paulo / SP

### Authors:

Ana Cristina Jimenez, Liliane Batista Barbosa de Souza, Mariano Ribeiro da Silva, Olga Fogaça Balboni Cunha Geremias

### Context and objective:

A monthly gathering that takes place in the green and playful space of the Garden of Play at Sesc Interlagos, aimed at fostering children's interaction and enchantment with nature through play.

### Methodology:

The starting point of each gathering is the observation of what the vivid space offers and suggests. Play is the language. For play, what is made available is nature: trees, water, soil, flowers, seeds... and tools that go beyond plastic, screens, and ready-made toys.

### Results:

Creation of a bond between children and the action and space (they come back, take care, transform); strengthening of intergenerational exchanges, especially based on emotional childhood memories awakened by contact with natural elements (lágrima, colorau, arupemba); expansion and diversification of the educators' repertoire.
