# ESPAÇOS NATURALIZADOS PARA AS INFÂNCIAS

## Child x Nature - Life happens outside

### Theme/Place:

Outdoor play - Novo Hamburgo / Rio Grande do Sul

### Authors:

Isabel Maria Lopes, Maiara Queiroz de Souza, Wanessa da Silva

### Context and Objective:

Our objective is based on a guiding principle that the school has in its essence and in its identity: to welcome and to unwall. We believe that playing outside is a child's right.

### Methods:

Unwalling provides children with: feeling, observing natural phenomena, investigating, listening to the birds, resting, observing the sky, silence; all of that welcoming this body that seeks new experiences and contributes to physical, intellectual and emotional health.

### Results:

Outdoors, children are happy; children and nature welcome and respect each other. Being there is part of their daily lives; it is enriching; there, learning happens intentionally. There is no better result than this: hearing and observing, from the children and the community, that in the forest they really live and play.
