CONFERENCE

# NATURAL PLAYSPACES FOR CHILDREN

## Children's Trails

### Theme/Place:

Outdoor learning - Florianópolis / Santa Catarina

### Authors:

Lesly Monrat

### Context and objective:

The project creates affective experiences on trails in Florianópolis, promoting the sensorial identification of biomes, local histories and exchange with nature in the experience of free learning.

### Methodology:

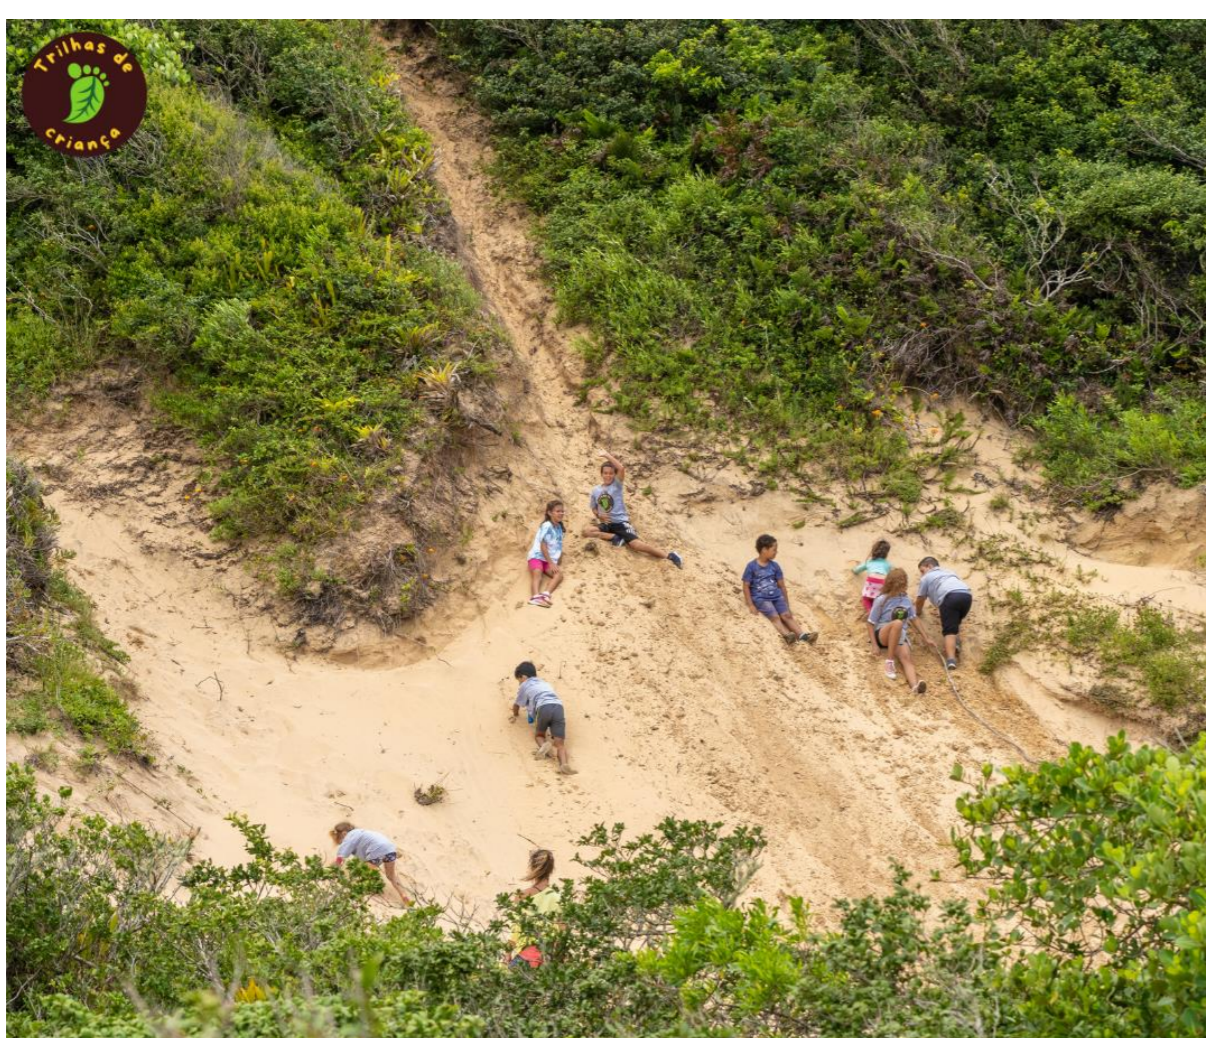

We follow the free play and free learning approach. Children are protagonists in their experiences, connecting with nature through self-stimulation, curiosity and imagination, activated by the local context rich in ecosystem.

### Results:

Self-awareness and connection with the natural world, allowing children to better understand themselves, their emotions and their bodies, in addition to developing a social and environmental awareness with appreciation for biodiversity and different cultures, activated in an experiential and meaningful collective learning.
