CONFERENCE

# NATURAL PLAYSPACES FOR CHILDREN

## The life of the stick insect

### Theme/Place:

Outdoor learning - Acauã / Piauí

### Authors:

Almir Francisco de Sousa  
Marta Lúcia Sousa Silva

### Context and objective:

While playing in the school garden, one of the students was startled to see an insect with a thin and elongated body, showing curiosity, from then on, he began an investigation in order to make new discoveries.

### Methodology:

Where is the stick bug, how is your life? There were original concerns, unfolded into so many others that led the group to gather in conversation circles in the shade of trees, to observe the habits and habitat of this insect and experiment with strategies driven by curiosity.

### Results:

The glow in the eyes was configured as the main result, as it was about something belonging to the group and of common interest, which added to the new discoveries through research, contact with nature, exchange of experiences, exploração de diferentes espaços e envolvimento dos responsáveis, resultou o sucesso do projeto.
