NATURAL PLAYSPACES FOR CHILDREN

My territory, space and natural experience for the childhood, inclusion and contemporaneity

Theme/Place:

Impact based on evidence - Lajeado / Rio Grande do Sul

Authors:

Sandra Wolf and Paloma Silva

Context and objective:

Space for human and natural lives of different ages, with focus on childhood potential, where the evidences of inclusion in the adaptation, cognitive and social development are highlighted.

Methodology:

Naturalization of proposals with spaces and natural resources use as priority. Daily time organized to idleness, contemplation, choices, creation, participation, production, researches and discoveries, and not to the results. Furthermore, guidance of self knowledge of the adults along the children.

Results:

Clear evidences of cognitives and social aspects evolution. In the protagonism and autonomy of all the children, but specially the ASD, ADHD and Down Syndrome ones, who were participating so far. Relationship, interaction and school participation responses.
