Child is nature: experiences for unwalling childhood in Material Rioeduca

Theme/Place:

Impact based on evidence - Rio de Janeiro / RJ

Authors:

Cátia Cirlene, Jéssica Silva, Josele Teixeira e Thaís Barcelos.

Context and objectives:

The Rio de Janeiro's municipal education network produces its own didactic material intended for use by children based to the practices consistent with the context of Early Childhood Education today.

Methodology:

Elaboration of didactic material by the Early Childhood Education Management, with graphic design by MultiRio, wich proposes experiences that prioritize the relationship between the child and nature, from the conception that we're nature and part of life on Earth.

Results:

Material serves 180,000 children from our public education network and partner units. The experiences proposed in it influence the teachers' daily practices, which are shared with the schools in Rio de Janeiro and Brazil through social networks, which, in turn, feed back the elaboration of the Material.
