CONFERENCE

# NATURAL PLAYSPACES FOR CHILDREN

## Outdoor educational experiences in Brazil and other countries: historiographic trajectory - 20<sup>th</sup> and 21<sup>st</sup> centuries

### Theme/Place:

Impact based on evidence - São Paulo / SP

### Authors:

Fauston Negreiros, Marilene Proença R. de Souza, Beatriz de Paula Souza, Clara de O. Buonicore, Nathan P. B. Rosa - LIEPPE/IPUSP

### Context and objective:

Given the great confinement of children today, we offer grounds and school proposals for EF I based on a retrospective of educational experiences in contact with nature from 1901 to 2022.

### Methodology:

Historiographic-documental survey, reflections on the main outdoor educational experiences in Brazil, Europe and other Latin American countries in the 20<sup>th</sup> and 21<sup>st</sup> centuries with historical markers, using historiographical sources and images.

### Results:

Timeline (<http://sites.ip.usp.br/linhadotempo>). Findings such as: open-air schools were responses to health crises in the last century and are now taking place for environmental and educational reasons; expanded or shrunk according to political openness; they're liberating only in an educational project as well.
