NATURAL PLAYSPACES FOR CHILDREN

Urban Microparks of Fortaleza

Theme/Place:

Greening spaces for children and youth - Fortaleza / Ceará

Authors:

Angélica Leal (Author); Luciana Lobo (Co-Author); Juliana Brauner (Co-Author); Camila Albuquerque (Co-author); Raquel do Vale (Co-author).

Context and objective:

The City of Fortaleza has created Micro Parks with naturalization principles in dense urban areas of the city. The parks seek to expand green areas and offer leisure spaces for children.

Methodology:

The methodology involves the following steps: validation of the territory, communication plan, social participation, technical projects and work execution, monitoring the use of the space, Maintenance Manual, and transfer of the maintenance methodology to the adopter.

Results:

Among the results obtained, the following stand out: the positive change in the population's perception about the importance of environmental preservation of the area, the increase in community coexistence from the use of the recovered green area, and the improvement of the local microclimate and air quality.
