NATURAL PLAYSPACES FOR CHILDREN

Sensory Garden - Outdoor experiences with natural elements for early childhood

Theme/Place:

Greening spaces for children and youth - São Paulo / SP

Authors:

Ana Taís Gonzaga; Fabiano Ferreira; Rafael Ghirardello; Samuel Alves; Jusiléia Oliveira; Vanessa Amorim

Context and objective:

In an outdoor space, it seeks to allow babies and children from 0 to 3 years old to explore the different senses and develop family bonds, through the integration between children and their caregivers.

Methodology:

The activity takes place in an open-air space, natural elements are used as raw material for spontaneous play, with the mediation of an educator, with each proposition different materials are explored, which provide different sensory stimulation.

Results:

Being in contact in the nature helps in the development of relevant cognitive aspects, in addition, it provides a close relationship between babies and caregivers, makes it possible to develop awareness of sustainability from birth, and can impact the formation of a new generation.
