NATURAL PLAYSPACES FOR CHILDREN

Resignify nature

Rethinking actions outside the school walls

Theme/Place:

Greening spaces for children and youth - Macaíba / Rio Grande do Norte

Authors:

Josefa Lucila Felix Moreira

Priscila Karla de Araújo Figueiredo Brito

Context and objective:

The project addresses the different articulations that allow and validate spaces for creation in nature, experiencing meaningful experiences so that they develop an emotional bond with it.

Methodology:

Children experience in practice everything they learned in the classroom in relation to nature, preservation and sustainability, with elements so that we can leave the school walls, and involve families and the community in a greater good that is the preservation of nature.

Results:

The proposal was to form multipliers of this very charming project. Considering that the theme nature is extremely relevant today. It was a work developed by several hands who believe in the educational and social potential that the project has.
